Sarah: SitRep Input:

There were 4 River and 30-40 well water samples collected today. There are 7 consistent locations for daily river sampling. Samples were to be sent to the EPA Laboratory, Golden CO for analysis. Further laboratory analysis using CLP (Contract Laboratory Program) is being put into place. The labs will have 24-hour turn-around and be EPA Drinking Water Certified. All samples analyzed will be compared to both drinking water MCLs, and Animas River toxicity screening values for both human and ecological receptors.

Further questions regarding availability of water for produce and orchard growers in La Plata County needs further assistance.
